BRITENOL®
hydracial

BRITENOL®

Alpha-Arbutin & Vitamin C Brightening Solution.

BENEFITS:

Brightens and balances skin tone while minimising the appearance of dark spots and sun-spots.

INGREDIENT HIGHLIGHTS:

Alpha-Arbutin: Brightening agent. Works as a tyrosinase inhibitor to block melanin production and provides natural lightening of pigmentation

Vitamin C: Antioxidant.

Stabilised, oil-soluble form clarifies and brightens skin, functioning as an antioxidant to produce collagen.

Bearberry Extract: Brightener

Antioxidants: a unique blend of antioxidants including horse chestnut, arnica flower and green tea helps to detoxify skin and fight free radical damage.

DERMABUILDER™

Advanced Age-Refining Peptide Complex

SMOOTHING & REFINING

BENEFITS:

Helps smooth the appearance of fine lines and wrinkles and enhances skin elasticity.

INGREDIENT HIGHLIGHTS:

Palmitoyl Dipeptide-5

Diaminobutyroyl: Peptide

Hydroxytheonine: Peptide

Palmitoyl Dipeptide-5

Diaminohydroxybutyrate:

Peptide

Designed to help stimulate collagen production and improve cell structure strength.

Helps smooth the appearance of fine lines and wrinkles whilst increasing skin firmness and enhancing skin elasticity, resulting in even skin tone and texture.

CIRCADIA® CHRONO-PEPTIDE

Smoothing & Refining Solution

SMOOTHING & REFINING

BENEFITS:

Reduces the appearance of fine lines and wrinkles. Energises the skin. Leaves skin feeling radiant and glowing.

INGREDIENT HIGHLIGHTS:

Chronocyclin Peptide: Anti-aging Chrono-peptide, optimises skin cell's physiological activities of regeneration and stimulation of Vitamin D.

NeoDermyl: The "needle-free" collagen and elastin filler, pure source of bio-energy to recharge skin's beauty, boosts skin density and overall firmness.

Matrixyl Morphomics Peptide: Newest peptide in the Matrixyl family, clinically shown to reduce the appearance of expression lines.

Matrixyl Synthe'6 Peptide: Assists in stimulating dermal matrix proteins, clinically shown to decrease wrinkle depth between 31–100%

NASSIFMD® HYDRAGLUCAN™

Intense Hydration Booster

HYDRATING

BENEFITS:

Proprietary cocktail of ingredients will hydrate, repair, rejuvenate and protect the skin. Restores plumpness, radiance and addresses the sign of ageing.

INGREDIENT HIGHLIGHTS:

Hyasol: High Molecular Weight Hyaluronic Acid—Forms a thin film that acts as a natural humectant.

N-Acetyl Glucosamine (NAG): Provides hydration and anti-ageing benefits to the skin, as well as increases the skin's water binding and plumping.

Betaine: A natural moisturiser that helps to retain vital moisture and maintain cell water balance.

CIRCADIA® PROTEC PLUS

Calming and Hydration Booster

HYDRATING

BENEFITS:

Protects the skin from free radical damage. Provides optimal hydration. Reduces visible signs of redness.

INGREDIENT HIGHLIGHTS:

Diffuporine Peptide: Increases skin hydration and presence of Aquaporin channels in the cell, recognised as an intrinsic cell hydrator.

Brightenyl: Delivers essential antioxidants, protects against inflammation, reactive oxygen species and reduces pigmentation.

Acqua Cell: Increases hydration levels in the skin, diminishes fine lines and wrinkles.

Hyaluronic Acid: Multiple weight hyaluronic acid blend designed for maximising hydration effect and key ingredient delivery.

REGEN GF™

Skin Perfecting Protein Solution with M-007™ Technology

BENEFITS:

Regenerative Peptides mimic growth factors to boost the production of collagen and elastin. Breakthrough M-007™ delivery technology enhances treatments by allowing deeper, more effective absorption.

INGREDIENT HIGHLIGHTS:

Heptapeptide-32 maintains the appearance of healthy, youthful skin through collagen and elastin production.

Copper peptide Cu-GHK

regenerates healthy-looking skin by accelerating wound healing and skin repair.

Palmitoyl tetrapeptide-7 treats inflammation while boosting the growth of collagen-producing tissues.

Palmitoyl tripeptide-5 helps skin cells flush toxins while enhancing the appearance of firmness.

Azelaoyl bis-dipeptide 10 addresses signs of ageing by managing the formation of free radicals.
